

# Building Tomorrow Now

## The Campaign for Equitable Access to Education

**Project Background:** On Island, year-round working families struggle to find childcare. Vineyard Montessori School, the Island’s largest provider of early education, is stepping forward with a transformative solution. The Campaign for Equitable Access to Education allows for a crucial expansion and renovation of this community school on its Vineyard Haven campus. The project will create two new infant classrooms and expand toddler and preschool programs, adding 43 additional spaces to the Island’s childcare capacity and making a critical impact on the childcare shortage. Campus renovations will also provide essential housing for staff, supporting long-term educational stability. The Campaign for Equitable Access to Education closes the gap island-wide to help build a healthy community where working families thrive.
